SUMMARY

I'm a developer at heart, an agilist by profession, and a big fan of automation and efficiency. I get the most joy out of helping companies streamline their processes and workflows so they can deliver faster and with better quality.

I'm always thinking outside the box, constantly bringing new ideas to the table. I take pride in craftsmanship and a job well done. And when it comes to AI? It's my assistant—not the other way around.

WORK EXPERIENCE

Independent Agile Coach | Self-Employed | Carrefour France (Paris) 2023 - 2024

- Implemented scaled agility using the SAFe framework across 20 teams (250 people) with the help of an agile community composed of 5 Scrum Masters, 1 RTE and a organizational coach.
- Streamlined project workflows, enhancing overall efficiency by more than 100%.
- Led multiple teams in successfully delivering a complex engineering project on time, while collaborating at scale and within the allocated budget.

Independent Agile Coach | Self-Employed | RAS Interim & ZOL web agency 2022 - 2023

- Implemented agility (Scrum, Kanban) within 2 companies simultaneously over a joint project.
- Coached Product Managers on their respective roles in discovery and delivery, improving their knowledge, enhancing the successful feature delivery rate by 200%.
- Worked with developers and QAs to improve their workflow resulting in more time dedicated to work—from 20% of the week to 80%!

Scrum Master, Vivlio 2021 - 2022

- Implemented agility (Scrum, Kanban) across the entire IT department within multicultural teams resulting in a significant increase in productivity, improved on-time delivery, and higher quality.
- Collaborated with the Engineering Manager to create processes for scaling environment (x7).

Software Engineer (Fullstack) / Scrum Master, THALES LAS France (Paris) 2019 - 2021

- Participated in developing state-of-the-art software used for military purposes.
- Developed strong skills in ReactJS and the web ecosystem
- Collaborated with cross-functional teams, enhancing project success rates.
